

PARETO BUSTING WORKSHOP SERIES

Inequalities are a fact of life. Gold is not found everywhere, but if you know where to dig you can become rich. Pareto Busting is an exploration into the inequalities surrounding your business. Some customers are more profitable than others. Some products or services command higher margins. Some processes create value while others add little or no value. Some decisions and activities position you for market-beating results while others cause you to lose your relevance in the marketplace. We will explore all these gold mines in Pareto Busting!

SESSION 1: TREATING UNEQUAL CUSTOMERS UNEQUALLY

- Looking for inequalities and asymmetry
- 80/20 your bottom line
 - ~ 80/20 customers by volume
 - ~ 80/20 customers by profitability
